Introduction

Overview

The Level 5 International Diploma in Supply Chain Management is designed to help professionals gain overall expertise in the global environment of supply chain. The course covers all concepts and skills required for professional development in supply chain management from its global nature, supply chain networks and supply chain flow planning.

Who is this for?

The Level 5 Diploma in Supply Chain Management is aimed at individuals working at managerial or supervisory level involved in planning and implementation of supply chain operations.

Learners from non-business graduation background but planning to begin a warehousing career can also benefit from this course.

Course Regulation

The CILT Off-Campus Diplomas are regulated by The CILT International Board. This course is available on the CILT E-Learning Platform facilitated by Prolific HR Consultants India Ltd.

Course Content

PD01 Management in Logistics and Transport

This unit presents the fundamental management knowledge required of managers in logistics and the transport industry. It covers aspects of the internal and external structures of an organisation, the governance of the people within the organisation and those financial and other planning techniques necessary to maintain organisational health. It aims to deliver the understanding and competence of those key elements of management practice that are fundamental to both commercial and non-commercial organisations.

PD02 Supply Chain Management

The aim of this unit is to introduce the main principles, concepts and practices of supply chain management. The content of the module covers four main themes. These are: what is a supply chain and supply chain planning, why it is important in any business, how the supply chain operates and the principles for supply chain

improvement. Where appropriate, the global nature of the supply chain will be emphasised.

PD16 Supply Chain Flow Planning

This unit deals with the issues of identifying the demand for products and then balancing it with the appropriate supply. The key issues involved with determining the level of demand are addressed and aspects of supply planning are then explored, highlighting the need for different strategies for different products. The unit also covers the use of inventory to balance the flows between supply and demand, together with the management issues surrounding the attainment of a consensus supply chain plan.

PD17 Supply Chain Network Planning

The aim of this unit is to provide Learners with the knowledge to plan, implement and manage a supply chain network in which products flow from their source to the end user. It deals with the complex issues of identifying the network requirements for different types of facilities based upon cost and service criteria.

Total Learning Time

The learning time is set at 360 hours as self-study hours. This is allocated as 90 hours for each of the 4 units.

Assessment

To achieve this qualification Learners must complete all four units.

The units will be assessed by a time-constrained, unseen examination conducted under closed-book arrangements. This will consist of a single paper of three hours duration for each unit.

Learners will be given the opportunity of two re-sits per examination. If after two re-sits Learners do not achieve a pass, then they will be required to re-register on the qualification to continue.

The overall pass mark for each examination is 50%

Continued.

Registration

Registration Period

The registration period for this qualification is 1 year, which is the period in which a Learner is expected to complete the qualification.

Registration Extension

At the end of the registration period all Learners will be withdrawn from the relevant qualification.

However, if an extension is required, learners must contact the CILT to request this.

Please note that there is a fee chargeable for each extension / re-registration.

Progression

Learners can progress from the CILT Level 5 International Diploma in Supply Chain Management to the CILT International Level 6 Advanced Diploma.
